- Sub 1
A2
17. (Added) A reflective display device comprising:
a light incident side and an opposite side, the display device comprising a diffusing liquid crystalline material,
a first substrate on the light incident side and a second substrate on the opposite side enclosing the liquid crystalline material, and
reflecting means between said first and second substrates which reflect light which is incident at an angle larger than a given angle of incidence θ_c and pass light which is incident at an angle smaller than said given angle of incidence,
